

ADVANCED ENDODONTIC SYSTEMS®

ERGO ELITE™ DRAWER/DOOR SYSTEMS

The New Ergo Elite with Drawers/Door

ASI's new Designer Series features the Ergo Elite Advanced Endodontic System, taking customization to a new level. An extensive redesign of our traditional model has resulted in a higher standard of instrument delivery. A new geometric profile provides better visibility of instrument control panels and increased worktop and storage space.

The Ergo Elite's four drawers can be ordered left or right facing to provide ergonomic delivery from either side of the patient. By adding the Assistant's Instrument Package (air/water syringe, saliva ejector, high volume evacuator, and solids trap), the system becomes an ideal rear delivery unit.

New Features

The Ergo Elite incorporates the latest advancements in design technology. New handpiece holders improve precision, access, and safety during activation. Stainless steel components permit worry free disinfection and enhanced reliability. The new chassis design, featuring fan cooling and a flip-down control panel, facilitates servicing and upgrades to the system. New custom colors and bonded quartz granite-look worktops add impact to office decor.

ERGO ELITE™ DRAWER/DOOR SYSTEM

IMPROVED DESIGN FEATURES

► *Personalized Integration*

Five instrument panels are available for the ultimate in instrument integration. Ultrasonic units, obturation systems, electric motors, and apex finders are conveniently located and individually configured for fingertip operation. All functions operate from a single foot control.

► *Capability*

Up to three pneumatic 4-hole handpiece connectors are included with an air/water syringe and an Endodontic air only syringe with precision regulated low pressure.

► *Functionality*

A streamlined, all-enclosed chassis conceals the dual clean closed water system and optional irrigation bottles behind the hinged door. The four drawer storage system can be specified left or right facing. The system also features a built-in nook for additional instrument placement.

► *Upgradeable*

The non-porous, hygienic Silestone worktop area can be enhanced with optional swivel trays or CPU, monitor, and keyboard mounts.

Sample configurations shown with optional instruments. Systems will be custom integrated with the brands/models of instruments you specify and in the order of placement you request. All systems can be equipped with optional computer monitor, keyboard and CPU mounts.

Prices and specifications subject to change without notice and do not include shipping and handling.
